

# Wisestones Review

by Helen Adams

## Wisestones The Fortune Teller & The Oracle By Patrick Campbell

Published By The Circle Of Raphael –  
£26.00

This is a complete boxed set which consists of two books, The Fortune Teller and The Oracle. There are ten terracotta stones each crafted with a different symbol, and a carrying pouch. A card is included for laying out the stones.

The system itself looks deceptively simple, and is very easy to use. You can give readings to yourself and others within minutes. You don't have to study anything before you begin. The author Patrick Campbell encourages the reader to learn as much about this system as possible, as you can then use it in the capacity of a professional reader, and charge for the advice given. You can take this system to any level you choose, and also experiment with different layouts and types of readings.

You can use either book or both on yourself for an up to date and accurate appraisal of your situation, with clear guidance as to what to expect in the future. The Fortune Teller book gives readings concerning your overall situation, romance and love, and work and money. Depending on

which two stones you choose and the order you choose them in. You can also add to the reading by finding the cosmic number and life path associated with each stone and the reading as a whole.

The Oracle enables you to get a more in depth view of your current situation and any subconscious patterns that may be affecting you.

A sample reading certainly seemed to hit home, and this was one taken right out of the book. Presumably the more skilled you become at using the stones, and the more willing to use your intuition, the more varied, interesting and accurate the reading will become.

At £26.00 per set it is quite expensive, but you also get a potential business in a box for this price. The author explains how to go about setting yourself up as a professional reader and how to give a professional reading.

If you are looking for an easy and fairly accurate method of seeing into your future, and that of others – you may want to try this out.
